EXPERIENCE

Full Stack Developer

Kletterstiege

08/2021 - 08/2021

- Designed the steps on the Kanban board, and assisted team members in organizing our tasks accordingly
- Built a SQL database and used Sequelize models to organize our tables and data structures
- Set up controllers/routes for the server to access the database and for the user to browse the website
- Worked with team members to design the user experience
- Initiated and formatted the Handlebars view pages
- Designed file structure in CMV format
- Assisted and solved team members' and my own git work-flow errors
- Met deadlines, met design standards set out for ourselves

Full Stack Developer

Doggo Finder

06/2021 - 06/2021

- Performed RESTful API calls and wrote the necessary data to the DOM
- Designed search functionality, search pagination, and displayed search results
- Worked my team through git workflow and error checking
- Assisted in designing page layouts, app functionality, and tech stack
- Delivered an MVP with complete usability and met our design goals

CERTIFICATES

University of Oregon Full-Stack Developer Boot Camp

10/2021 - Present

SUMMARY

As a Full Stack Developer I bring problem-solving, quick-thinking, excitement and passion for technology. I am a strong coder and ready and willing to learn any framework/language/tech necessary to produce innovative programs. As a previous Funeral Director I bring clear communication, team-building, and interpersonal skills that focus on customer satisfaction. I am confident I can succeed in any work environment that promotes passion, innovation, and productive teamwork.
