GRESHAM, OR

## Summary

Web Developer with a track-record of consistently writing, testing, studying, and deploying code on time. I have an eagerness to learn the latest approaches & emerging best practices and I've developed projects with multiple team members, using version-control(git) and a modular, OOP approach while ensuring clear communication with senior engineers. I have a strong passion for continuing education and learning new technologies that further develop my craft - as well as meeting other creative industry professionals that enhance my work and my life.

## Education

---

### University of Oregon

Full-Stack Web Developer Bootcamp • Eugene, OR

10/2021

- Currently completing courses in Full-Stack development with the latest best practices and emerging approaches to algorithmic solutions
- Top marks - asked by my instructor to tutor other classmates when appropriate
- Taken extra-curricular courses on JAVA and Algorithm Theory
- Helped set-up and run a study group of 5-6 students outside of class

## Skills

- 
- |                            |  |
|----------------------------|--|
| • HTML5                    | • JavaScript                             |
| • CSS                      | • AJAX                                   |
| • Information Architecture | • Clean and Modular Object-Oriented code |

## Experience

---

### First Call Mortuary Services

Funeral Director/Embalmer • Portland, Oregon

08/2009 - 10/2019

- Processed Death Certificates and detailed information of the deceased with the State of Oregon
- Coordinated with airlines, grieving families, cemetery operators, doctors, and more to fully arrange, prepare, and perform the services of the deceased
- Communicated my projects to my other team members and coordinated schedules/resources to accomodate each other and meet the client's needs
- Hired, taught, trained and mentored apprentices who are now licensed professionals working in the field.
